

EnerMOB PROJECT Newsletter #1 December 2018

BACKGROUND

In recent years, the European policies on the development of alternative fuels are acting as a driving force to several EU projects to promote sustainable mobility through the enabling of electric vehicles to circulate at least in urban/suburban agglomerations and other densely populated areas.

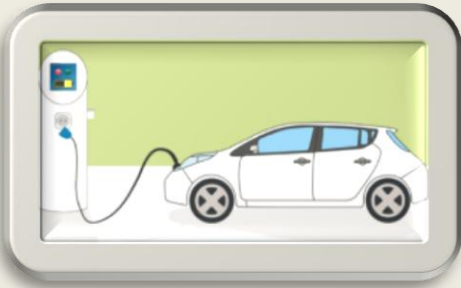

The ADRION area is featured by an inadequate coverage and accessibility of public charging infrastructure in order to enable electric vehicles to circulate in the ADRION regions, not to mention the lack of common standards needed for the operation of such infrastructure. Such criticality generates a limitation for the medium and long range trips within the ADRION regions for the use of electric vehicles.

PURPOSE OF THE ENERMOB PROJECT

The EnerMOB project aims to study and support common solutions for electric transport systems at interurban and interregional level, by implementing pilot networks of charging infrastructures and by assessing sustainable technologies to manage energy demand of electric mobility.

The project mainly aims to promote the use of electric vehicles in the existing regional/local transport systems of the ADRION area according to interregional common guidelines and to capitalize on experiences of already tested projects and actions by more advanced EU States.

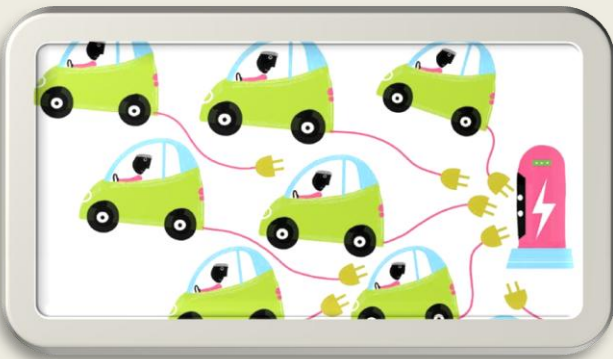

Within the project there will be developed the pilot actions to test longer connections between different cities with use of electric vehicles, by checking possible problems in the driving and charging phases. The project involves mainly regional and local authorities that can plan and implement pilot actions and small-scale investments, as well as it will also focus on the implementation of coordinated strategies through the use of common technologies and standards.

THE MAIN ACHIVEMENT - CONTRIBUTION TO THE PROJECT AREA

With all the activities carried out in the project EnerMOB, the project area will aquire new interregional electromobility networks for interurban low carbon mobility with small-scale infrastucture.

Electromobility not only helps drastically reduce climate-charging emission from vehicles, but also crucial to cut noise and air pollution levels in uraban areas.

MEETINGS of EnerMOB partners

1. MEETING: Kick-off meeting and 1st Steering Committee meeting

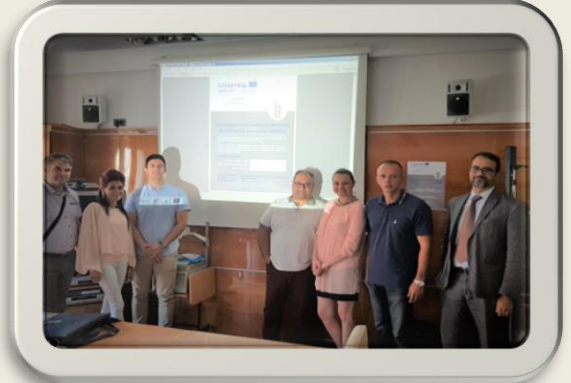

The first project partners meeting of the project EnerMOB took place on 23rd and 24th of May 2018 in Ragusa, Italy, where our Lead Partner - Free Municipal Consortium of Ragusa is located.

During the meeting the partners discussed about and established the project framework, project management and start-up activities. The lead partner presented general overview of the project, explained the pilot actions and challenges, highlighted the objectives and the work plan as well as emphasized the expected results and outputs of the project. The meeting was concluded with the activity plan for the future.

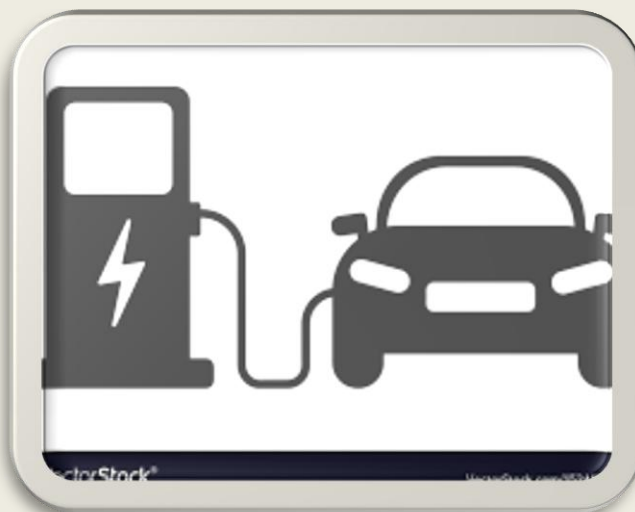

2. MEETING: 2nd Steering Committee meeting

The second Steering Committee of the project EnerMOB took place on 25th and 26th of July 2018 in Nova Gorica, Slovenia., where PP3 RDA of Northern Primorska Ltd. Nova Gorica is located.

The meeting was intended for a accurate discussion of individual activities of the project, especially financial reporting and operative issues, approval of communication plan and operative issues within work package »Start-up planning« as well as the Electromobility pilot actions work package. On the basis of a discussions between project partners, a new framework for the further implementation of activities was set up.

The next, 3rd partner's meeting, is planned for late autumn, in Rijeka, Croatia.

MAIN PROJECT INFORMATION

Project acronym	EnerMOB
Project title	Interregional Electromobility Networks for intERurban low carbon MOBility
Programme priority	3) Connected Region
Project duration	01.01.2018 - 31.12.2019
Project Budget	1.222.513,63 eur
ERDF and IPA II funding	1.039.136,58 eur
website	https://enermob.adrioninterreg.eu

This project is supported by the interreg ADRION Programme funded under the European Regional Development Fund and IPA II fund.

PARTNERSHIP

Free Municipal Consortium of Ragusa - LP

Region of Peloponnese - PP2

RDA of Northern Primorska Ltd. Nova Gorica - PP3

County of Primorje and Gorski Kotar - PP4

Regional economic development agency for
Sumadija and Pomoravlje - PP4

Associated Partner:

City of Kragujevac
